

PROJECT RISK MANAGEMENT

Synopsis

All projects are risky, and an effective risk management is a key contributor to project and business success. The aim of this training is to provide participants with an understanding of the theory and practice of risk management with focus on transition projects and programmes. This course addresses the problematic elements of risk management, presenting practical solutions to the most difficult parts of the risk process.

Training Objectives

1. Familiarise yourself with the risk concepts and risk management process
2. Learn tools and techniques to manage the risk effectively
3. Inspire to implement the management of risk into practice

Training Benefits

After completing the workshop the participants should be able to:

- Understand the risk concepts and risk management process
- Find and describe the risks and understand the issues with the proper risk identification
- Assess the risk: define the scale and understand the exposure
- Prepare the realistic responses
- Use the tools to manage the risk effectively

Teaching methods

- Interactive „learning by doing“ workshop
- The following teaching techniques will be used: short lectures, group discussions, case studies, check lists, team activities.

Course Program

1. Key concepts: uncertainty, risk, threat & opportunity
2. Risk process
3. Risk planning
4. Risk identification
5. Risk assessment
6. Realistic responses: strategies and tactics
7. Scenario activities

Course Duration

1 day
